

COOK Gets Direct.

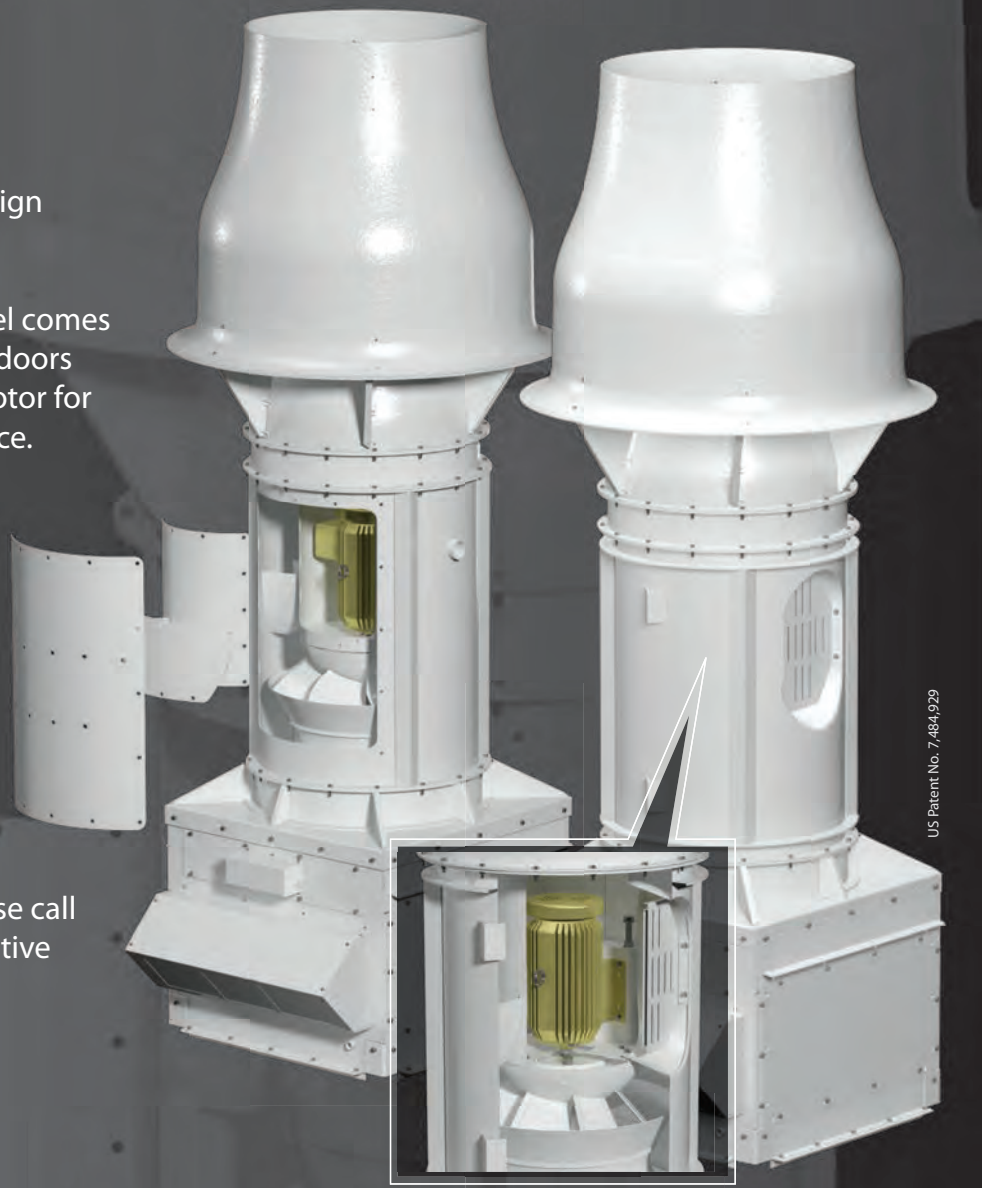

Introducing our newest direct drive Laboratory Exhaust Fans.

QMXD-VP is a perfect example of thoughtful design and execution.

Our new direct-drive model comes standard with dual access doors that allow access to the motor for inspection and maintenance.

Our optional bifurcated design exposes the motor for even easier access. We also offer this version with our "Easy-Out" motor option. This allows the motor to be removed without disassembly of the fan.

For more information please call your local Cook representative or visit our website.

US Patent No. 7,484,929

Optional Bifurcated Design with Easy-Out Motor (US Patent Pending)
